

## maps enhance delivery of services

### GIS Program Needs:

Executive/legislative recognition for GISCC

Sustainable funding for the Georgia GIS Clearinghouse

Enterprise GIS software

Spatial data standards

Geographic Information Officer (GIO)

**GISCC**

GEORGIA  
Geographic Information Systems  
Coordinating Committee

### Become a champion for GIS coordination and you could be saving more than just taxpayers' money.

Are all levels of government and private enterprise working together in Georgia to create data and maps that reflect our state's infrastructure and enable better decision-making?

Thousands of organizations carry out the day-to-day tasks of reducing crime, enhancing public safety, containing costs, managing growth, improving accountability and protecting the environment. Nearly all of them rely on geographic information systems (GIS) technology to make decisions that directly affect citizens and determine our quality of life. THERE IS A CRITICAL NEED to better manage our state via coordinated GIS activities.

Be a **LEADER** in your community...become a champion for GIS coordination. Georgia needs a sustainable GIS Program.
